Connector and cable assembly manufacturer with a vast product line serving a wide range of industries. Standard commodity, high-speed, high-density, spring-loaded, fine-pitch and harsh-environment interconnects, plus innovative custom designs for any application-specific requirement.

www.andersonpower.com

High-power interconnects for industrial, UPS, data centers, portable power, solar/renewable energy, marine, power generation & distribution, battery chargers, electric vehicles and lighting.

Designs and manufactures standard and custom transformers, inductors, filters, balun assemblies, chokes and related devices for baseband, broadband and power applications from 20 kHz to 1 GHz, for standard or rugged environments.

High-voltage ceramic capacitors for commercial/industrial power supplies, military avionics, radar, sensing, high-temperature geophysical and geothermal applications, and high-temperature electronics.

Full-service, ISO-certified circuit board fabricator. One-stop scheduling for long-range production plus quick-turn prototypes in 24, 48 or 72 hours; 24-hour e-mail file transfer. Facilities in Taiwan and China for higher-volume global production.

"Discrete-to-Digital" interface ICs for avionics and industrial markets. Broad range of analog and mixed-signal ASICs, plus custom RF designs for military, industrial and commercial applications.

High-performance microwave cables and cable assemblies for RF, 5G and test/measurement, engineered for frequencies up to 110 GHz. Specializes in PTFE tape wrapping, braiding and high/low-temperature jacket extrusion for medical imaging, aerospace, defense and quantum computing.

PRBX USA designs and manufactures power conversion systems for extreme environments, delivering mission-critical power solutions tailored for the aerospace, defense, medical and transportation industries.

Industry leader in customized laminated busbars engineered for efficient power distribution, offering low inductance, high power density, and compact, durable, reliable solutions.

SSRs and SSPCs up to 32 channels, 1275 Transorb modules, bi-directional pulse clamps, diode wafer fab to diode arrays up to JANS rated, motor controllers (speed, torque and sensorless control for brushless motors), power rectifiers and bridges. Ultra-compact, high-voltage, high-current packaging for high-reliability commercial aerospace, space & launch, defense and medical applications.

www.sensorantennas.com

Designer and manufacturer of high-quality antennas for commercial, military and business aircraft, specializing in communication, navigation, GPS and Link 16 datalink solutions for aerospace platforms.

Leading provider of technically differentiated electronic components, subsystems, and microwave and RF products for aviation, defense, space, medical, rail, semiconductor test, wireless telecom and industrial markets. Portfolio includes high-reliability electrical connectors, cable assemblies and innovative RF/microwave solutions.

www.voltagemultipliers.com

Designs and manufactures high-voltage diodes, optocouplers, power supplies and power hybrids for high-reliability applications.
